Ganzglasduschkabine BO 305 Glass Shower System BO 305

Klares Design kombiniert mit raffinierter Technik! Die breite Typenvielfalt von BO 305 stellt sicher, dass dieses Ganzglas-Duschkabine in den verschiedensten Ausführungen Anwendung finden kann. Selbst Rundduschen sind realisierbar; die notwendigen Rundgläser sind dann im Lieferumfang enthalten. Es besteht die Möglichkeit, überlappende oder fluchtende Glas-Glas-Beschläge einzusetzen. Die fluchtenden Beschläge haben eine durchgehende Dichtung, die überlappende Beschlagsvariante wird ohne eine zusätzliche Dichtung montiert. Die Spritzwasserdichtigkeit ist immer gewährleistet. Modernes Design, schnell und sicher montiert, komfortabel und bequem in der Handhabung, das ist BO 305.

Clear, clean design lines combined with true technological refinement! The versatile BO 305 shower system can be used for many different configurations. Even curved cubicles are possible, with the required curved panels then included in the scope of supply. Overlapping or flush glass-to-glass panel fittings are both available. The flush fittings have a continuous seal; the overlapping fitting version is assembled without an additional seal. Complete prevention of spray water escape is guaranteed in both cases. The BO 305 features a modern design, is quick and easy to install and utterly user-friendly.

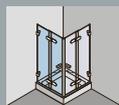

BO 305 TYPE 255

Beschlag

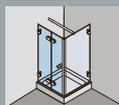

Die Beschläge sind für durchgehende Dichtungen ausgelegt.

Fitting

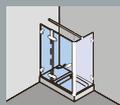

The flush fittings are designed for continuous seals.
