## Extra features

### MUTO

MUTO is a manual sliding door system - with many variations that allow all relevant functions to be configurable from the front.

With MUTO installed on your Flipp system, you benefit from a self-closing function and an integrated lock without an external power supply.

Fits to glass or wooden solutions

Personalized design: Silver, similar to stainless steel, white, specially anodized, special colors - depending on your style

For one and two-leaf doors

### CS 80 Magneo Sliding Door Operator

Outstanding user convenience and unique operational behavior characterize the automatic sliding door operator CS 80 MAGNEO.

The door is driven by the magnetic and thus contactless shear wave of a linear DC motor. The CS 80 MAGNEO thus offers the twin benefits of almost silent operation and the ultimate in reliability.

- Flexible and versatile
- For single-panel doors
- Door width from 650 to 1060 mm
- Simple installation, easy operation
- Modular system

## Extra features

### TS 92 Door Closer

Flipp Interior Glass System can be combined with TS 92 - the only door closer, that can be installed to toughened glass doors.

- For barrier-free doors
- Easy opening of doors
- Adjustable closing time

### Panic device for glass doors

Panic device can be added to Flipp glass system in compliance with fire/life safety codes.

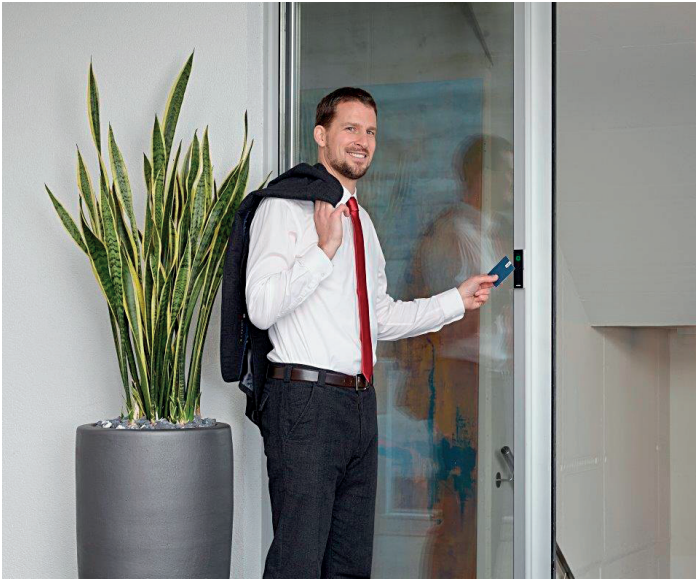

### dormakaba c-lever kompakt

The electronic fitting can easily be installed on the system profiles.

C-lever kompakt is an elegant and functional door fitting that opens your doors in a natural way: just present an authorized access medium to the c-lever.

You can set your access rights and change them quickly and flexibly whenever you need, operate your system in standalone, remote or on line mode.

## Extra features

### **dormakaba kompakt reader**

The electronic fitting can easily be installed on the system profiles.

You can control access for an almost unlimited number of users for specific locations and times, while continuing to use the mechanical master key system completely independently.

- Wide range of designs for applications worldwide
- Battery integrated inside housing

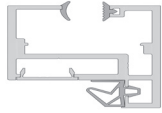

### **Timber doors**

Adding timber door leaf to the glass system is an effective way to enhance the office space look.

- Great option for both modern and traditional spaces
- Design remains clean and simple - it perfectly combines the rich feel of timber doors with the simplicity of g
