

ES 400 System

Hospital sliding door
operator

ES 400 System – reliable and powerful in compact design, especially suitable for application in hospitals

As a compact and innovative sliding door operator, the DORMA **ES 400** is especially suitable for application in hospitals, institutes or laboratories. Thanks to its simple and low-maintenance design, it guarantees easy handling and reliable function as well as a long life cycle.

For single- and double-panel doors

The DORMA **ES 410** effortlessly operates single-panel doors with a weight of up to 200 kg at a passage width of up to 3 m, while the DORMA **ES 420** is especially suitable for double-panel doors with a door-panel weight of up to 2 x 125 kg.

We have just added the telescopic **ES 415** sliding door operator to our program range. Thanks to its slender dimensions and its various **ES 410** components, this operator for single-panel doors perfectly complements our **ES 400** system.

Due to their high operating dynamics, all operators provide smooth operating behaviour combined with excellent operating characteristics.

The respective risk assessment will show which safety devices according to DIN 18650 (Germany) are required. German type approval according to DIN 18650: 21201004.

Features and benefits

- Compact design
- Excellent operating dynamics
- Applicable for heavy doors in stainless steel design
- Self-learning
- Parameterisation via software
- Push & Go function
- Separate input for control via fire detection system
- Integrated airlock function for up to 3 door sets
- Automatic changeover to manual closing
